

DO NOT FULLY TIGHTEN THE BOLTS BEFORE ASSEMBLING ALL THE PARTS

Assembly is easier with two people, one to hold the parts and a second person to insert the fixings.

Tools required: screwdriver and pliers - tong supplied

1) Assemble the 3 legs (G) to the bottom bowl (A) using 6 screws(S1) and 6 nuts(N1). Assemble the ash tray (J) to the bottom bowl (A) using 3 screws (S1) and 3 nuts (N1).

2) First, put adapter (N) inside air vent. Then assemble air vent (P) to ash tray (J) using 2 screws(S1) and nuts (N1)

3) Attach the tap bowl (B) to the bottom bowl (A) using the rectangular brackets with 6 screws (S1) and 6 nuts(N1). Assemble the BBQ grill bracket (L) to the bottom bowl (A) using 2 screws and 2 nuts (N1)

4) Screw the lower chimney section (C) to the top bowl (B) using 3 screws (S1) and nuts (N1).

5) Screw the upper chimney section (D) to the lower chimney (C) using 3 Screws (S1) and nuts (N1).

6) Screw the top funnel (E) to the upper chimney section (D) using 3 Screws (S1) and nuts (N1).

7) Put the lid (F) on the top funnel (E). Remove the lid when using the chimenea.

8) Fix the hinge bracket to the assembled bowls and attach the mesh door (I). Attach the BBQ grill (H) to the chimenea if required. Place the charcoal grill (K) into bottom bowl

Tighten all fixings - Your chimenea is now ready to use.
